Order Images Description

With this extension, store administrators will notice product images alongside ordered items while processing orders. This feature is a must-have for shops with large turnover of small and unique products. The administrator can quickly find ordered items in the warehouse and send them to the customer. Ordered items are visualized for customers too.

Configure Order Images

Order Images is an easy customizable and handy extension. It helps to display images of ordered items to both store administrator and a customer which is very convenient.

To configure the extension, go to the **System** → **Configuration** → **MagPleasure Extensions** and open the **Order Images** tab.
